

"A Child's Innate Ability Diminishes If It is not Stimulated."

"I believe that to raise children who will be capable of soaring up into the 21st century, it is necessary for us to wake up to the fact that unknown and unexplainable abilities do exist. It is necessary to put new methods of education into practice that will develop these special abilities."

(Prof.Makoto Shichida)

Some of blindfold capabilities able to demonstrate:

- *Reading with eyes closed*
- *Guessing a card with eyes closed*
- *Walking with eyes closed*
- *Biking with eyes closed*
- *Guessing a thing behind a wall*
- *Reading a closed card/document, etc.*
- *Blindfold testing not only by using a piece of clothe but also Google blindfold, as to show that this capability has nothing to do with peeping.*

The Benefit of Brain Activation:

1. To activate and sharpen the **intuition** existing in the right hand side brain. Sharp intuition is very useful in all sectors of life.
2. To increase concentrating power, learning focus and creativity.
3. To construct better child's personality (positive attitude), self confidence, diligent and many more.

Brain Activation applies open method well known to people, and the implementation of audio technology functions to stimulate left and right brains including the capability of a child's intuition which is able to be demonstrated directly by the children at post activation.

What is intuition?

Cited from Wikipedia.org:

Intuition is a combination of historical (empirical) data, deep and heightened observation and an ability to cut through the thickness of surface reality. Intuition is like a slow motion machine that captures data instantaneously and hits you like a ton of bricks. Intuition is a knowing, a sensing that is beyond the conscious understanding – a gut feeling. Intuition is not pseudo-science. – Abella Arthur

Intuition (is) perception via the unconscious - Carl Gustav Jung

INTUITION may be defined as understanding or knowing without conscious recourse to thought, observation or reason. Some see this unmediated process as somehow mystical while others describe intuition as being a response to unconscious cues or implicitly apprehended prior learning - Dr. Jason Gallate & Ms. Shannan Keen BA.

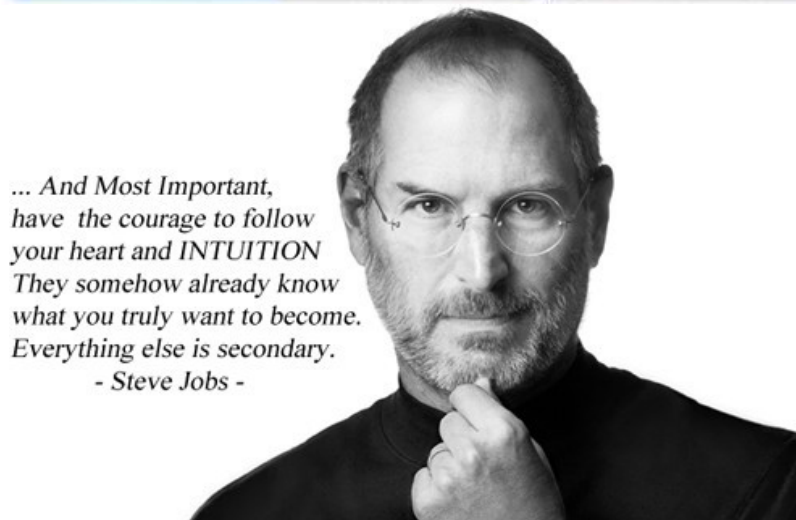

Facts Regarding The Awesomeness of Intuition...

1. Albert Einstein (1879-1955), a scientist who also empowered his intuition once said :

- "I never found understanding about universal law only through analytical thoughts. The only real valuable thing is intuition."
 - "Logic will get you from A to B. Imagination will take you everywhere"
2. The astronauts spent 90% of their times to practice their reactions based on intuition.
 3. Ray Kroc purchased McDonald's franchise at too high price by that time. Uniquely, he said, "It's my intuition that pushed me to purchase and it's an obligatory!" His intuition was true, and it's proven now that McD spreads worldwide.
 4. Sam Walton, the founder of Wal Mart applied his intuition when establishing his shop in 1962 and now, he and his family becomes one of the richest people in the world.
 5. A research from New Jersey Institute of Technology discovered that 80% of company management or CEOs able to double their profits within 5 years have applied their intuition capabilities. John Mihalasky and E. Douglas Dean found that 80% of successful CEOs have intuition capabilities above average.
 6. John C. Maxwell said that "without intuition, a leader becomes blind and it is the worst thing that may happen to a leader"
 7. "Intuition becomes increasingly valuable in the new information society precisely because there is so much data." - John Naisbitt –
 8. "Learn to let your intuition -gut instinct- tell you when the food, the relationship, the jobs isn't good for you" - Oprah Winfrey
 9. "The power of intuitive understanding will protect you from harm until the end of your days" - Lao Tzu
 10. "All you have to do is pay attention, and awareness grants you access to every corner of the infinite field" - Deepak Chopra
 11. World class successful people such as Warren Buffet and George Soros who play roles in the risk full businesses such as shares and foreign exchange also acknowledge that intuition plays an important role in decision making and not just relying on mathematical (technical) and fundamental analysis, meaning that the left brain (analytical) and right brain (intuition) run together, side by side.

There are still more benefit of intuition for example we will get an alarm each time there is a danger/disaster threatening, knowing whether a business partner is trustable or not. Being a leader of organization, one can take quick decision (reducing human error), or if being a businessman, he or she can read a profitable business opportunity, etc.

**So whatever the profession is, intuition is very useful
in any sector of life.**

Absolutely not.

Palmistry or Chiromancy is the divination of the future through the interpretation of lines of the palms whereas Dermatoglyphs is the science of comparing analysing and classifying the patterns of the skin grains and ridges of each person's fingerprint. These analysis do not predict the future, but rather gives a comprehensive insight of one's innate intelligence distributions, potentials, traits, preferred learning and communication styles.

How is Dermatoglyphs Analysis in comparison to conventional methods?

Conventional Testing uses questionnaire format where most of the time answers can be influenced by the emotional and mental state, wherein Dermatoglyphs Analysis is unaffected by such parameters hence offering most vivid results

How reliable?

Since years many scientists and medical doctors have used genetics, embryology, Dermatoglyphs, anthropology and anatomy as basis to observe, analyze, validate and conclude the result of Dermatoglyphs. It has been most advanced and useful tool to understand the potential functioning of brain lobes. As fingerprints are unalterable and are never influenced by environment, behaviors, companies & moods, the reliability of the fingerprint analysis remain on top. The accuracy is up to 95%.
